

Alliance Academy for Innovation SkillsUSA Sponsorship Application

SkillsUSA is a partnership of students, teachers, and industries working together to ensure that America has a quality skilled workforce. In order to improve said workforce, we educate our membership on a Framework based on Personal, Workplace, and Technical Skills Grounded in Academics.

In order for our kids to be part of this growing organization, we need the funding that will allow them to master these essential Framework Skills. These donations are needed to provide and offset costs for events, training sessions, meals, transportation, competition materials, and everything that is needed to make this program successful and engaging.

Our kids hope to attend our Regional, State, and National Championships as well as, internal training programs, social events, and a celebratory end-of-year banquet. We also provide certificates, blazers, office materials, snacks/meals, awards, and regalia for our kids so they can be rewarded for their hard work in developing their skills with professionalism.

In order to provide and offset the costs for these things, our program needs financial support. Rather than waste time and energy on fundraising, we have chosen to work with a new sponsorship system this year. If you are willing and able to help us, we have a few complimentary items we can provide in return.
